More than 40 years of continuous development

Continuity, quality and a high vertical range of manufacture are the prerequisites to offer our customers the technically and economically best solution for their bolting needs. Since 1979, all bolting tools have been developed and produced at ITH Bolting Technology's headquarters in Meschede, Germany.

All options - including documentation or angle-controlled tightening - can be selected according to your requirements. Personal contact is essential - contact our team for individual technical advice. All contact information can be found on our website www.ith.com.

We are looking forward to working with you,

Dipl.-Ing. Frank Hohmann
Managing owner | CEO

*Comparable bolting conditions

Battery Nut Runner

Type ADS

Functions & advantages

- ✓ Best power-to-weight ratio Nm / kg in its class.
- ✓ Safety turning knuckle: Gentle on the wrist, reaction moments that occur are not passed on to the user. Easy and fast positioning of the gearbox (the support) in 360°.
- ✓ Automatic shut-off and free-run: After reaching the torque, the ADS switches off automatically and rotates freely. This prevents the socket or support from jamming.
- ✓ Accuracy of $\pm 4\%$ referred to the final value*.
- ✓ Flexible, fast, handy work due to cordless system.
- ✓ Expandable application possibilities with customized supports, ITH Extensions and ITH Side-drives.
- ✓ Choice of batteries (Li-Ion and Li-HD) according to your requirements: 5.2 Ah, 8.0 Ah or 10 Ah. The ITH ADS is officially part of the Cordless Alliance System CAS. Read more on our website.

Type ADS Battery Nut Runner

Compact high performance planetary gearbox

Fine-toothed spline

to individually adjust the support in 360°.
See page 24 for all supports.

Square drive

for individual power wrench sockets including fixation mechanism.

Pistol grip

non-slip.

High-technology 18V-Li-Ion batteries

ITH ADS is part of the CAS cordless alliance system and offers 3 capacities:

18 V; **5.2 Ah**, Li-Ion Power (standard up to ADS 400)

18 V; **8.0 Ah**, Li-HD high-performance (standard for ADS 600)

18 V; **10.0 Ah**, Li-HD high-performance

Safety turning knuckle

Slide switch

gear selection between load or high gear.

Motor LED

offers ongoing user feedback.

Powerful brushless motor

brushless, therefore particularly low wear.

Ergonomically positioned

On / Off switch and **directional switch** for Loosen / Tighten.

Version ADS Digital

Torque adjustment and application management with the "ITH Smart Control", which controls the ADS Digital wirelessly.

Type ADS Technical data

Scope of delivery

Standard:

- 1 x ITH Battery Nut Runner
- 2 x Li-Ion batteries
- 1 x quick charging station
- 1 x support
- 1 x calibration certificate
- 1 x instruction manual
- 1 x plastic case (optional)
- 1 x hard case (optional)
- 1 x power wrench socket (optional)

The scope of delivery can be personalized.
Illustration with optional accessories.

Type ADS CAS

100 % Compatibility

ITH extends CAS

1 battery for more than 300 tools

- ✓ More than 30 brands and over 300 machines but only 1 battery system:
The Cordless Alliance System (CAS) is a cross-manufacturer battery pack system with 100 % compatibility for tools with 18 volt class batteries.
- ✓ Latest Li-Ion battery high-performance technology from Metabo.
- ✓ Read the official news on www.ith.com

Available battery packs:

1. 18 V; **5.2 Ah**, Li-Ion Power (standard up to ADS 400)
2. 18 V; **8.0 Ah**, Li-HD, high-performance (standard for ADS 600)
3. 18 V; **10.0 Ah**, Li-HD, high-performance

Every standard delivery contains 2 batteries.

Documentation of torque values and rotation angles

ITH documentation software Docu offers easy digital management and data logging of all bolting job parameters such as:

- ✓ Torque and angle of rotation (option ALPHA).
- ✓ Bolt dimension and bolt quality.
- ✓ Application, bolt or worker identification numbers.
- ✓ Creation of Excel- or PDF protocols.
- ✓ Docu-Software usable on Windows or Android devices.

Process:

1. Create a bolting job.
2. Data transfer to the ITH ADS by wireless Bluetooth connection.
3. Start the job.
4. Save the results.
5. Data read-out and automatic creation of protocols.

Functions of the Docu-Software:

Scan the QR code and watch the demo video on your smartphone.

Smart Control Plus

- ✓ For the use of ADS Docu Software, wireless Bluetooth connection to the ADS.
- ✓ Robust industry-ready hand-held device with large 6" display.
- ✓ Fall protection from up to 1.2 meters height by hardened rubber cover, IP67 protection class.
- ✓ Integrated 1D / 2D barcode scanner, up to 25° inclination.
- ✓ Battery runtime: 8 hours.

Smart Control

- ✓ Handheld "ITH Smart Control" for wireless control of the ADS.
- ✓ High-definition colour display offers easy setup of torque, load or speed gear, and rotation angle (option ALPHA only) and more.
- ✓ Clear status display of the battery charge level, the radio connection and the bolting progress. Users can easily control the bolting process.
- ✓ One ADS Smart Control can run several ITH ADS
- ✓ Once the bolting parameters have been entered, the data can no longer be changed by the worker. This has a positive effect on process reliability.

Quick charging station

- ✓ 1 x high performance quick charging station, air-cooled.
- ✓ Available versions:
 - 230 V EU
 - 110 V USA
 - 240 V United Kingdom
 - 230 V Australia

The picture on the right shows quick charging station of the version ADS Digital with ADS Smart Control and 5.2 Ah Li-Ion battery. Other versions come without the charging slot for the ITH Smart Control.

Type ADS **Option**

TWIN Safety Button

Functions & advantages

- ✓ The two-hand control requires users to push the yellow marked topside button and pull the trigger at the pistol grip simultaneously to start the torquing process.
- ✓ This keeps the hands in a safe position and promotes safe working environments.
- ✓ Visibly and ergonomic positioned: ideal for both horizontal and vertical applications.

Two-hand control

Type EDS Electric Nut Runner

Application examples

Electric Nut Runner

Type EDS

Functions & advantages

- ✓ ITH Soft Turn Automatic: The bolting process is constantly measured. The software automatically adjusts the RPM due to the current load.
- ✓ Automatic free-run: After reaching the preset torque, the EDS shuts off automatically and runs free. This prevents the socket from jamming on the screw head.
- ✓ Site suitability: Automatic indication of fluctuations in the power supply due to operation on generators.
- ✓ Optimal for international tool centers: Automatic detection and adjustment to 50 Hz or 60 Hz.
- ✓ 2-speed gearbox for changing between fast and load gear (automatic change with "Auto-Shift" option).
- ✓ High reproducibility and precision of $\pm 4\%$.
- ✓ The safety swivel joint always guarantees optimum positioning of the ITH EDS.

*Under comparable bolting conditions

Type EDS Electric Nut Runner

Rotary switch

for load or high gear
(not available with Auto-Shift).

Compact high performance planetary gearbox

Fine-toothed spline

to individually adjust the support
in 360°.
See page 24 for all supports.

Square drive

for individual power wrench
sockets including
fixation mechanism.

User-friendly multi-function display

only for version "EDS Digital".

Directional switch

for Tighten / Loosen,
construction site friendly
positioning.

Ergonomically positioned On / Off switch and lock switch

Ergonomic and comfortable spade-handle

Strong 1,300 W-Motor

Motor and housing stand for
quality made in Germany.

Multi-function display

Easy and convenient: Input of all relevant application parameters by multi-function display.
Control: the parameters can be read continuously on the display during operation.

Clear display:

- ✓ Process status indication.
- ✓ Tighten / Loosen.
- ✓ Angle of rotation (optional with ALPHA).
- ✓ Torque.
- ✓ Load gear or high gear (not available for Auto-Shift option)

Type PDS Pneumatic Nut Runner

ITH
Bolting Technology

**Find product details and videos
on our website:**

Scan the QR code with your
smartphone.

Application examples

Pneumatic Nut Runner

Type PDS

Functions & advantages

- ✓ No electric power supply required: Pneumatic air motor can be powered by standard air compressors.
- ✓ The required torque is set via the compressed air precision control valve at idling according to the tabular data.
- ✓ The change gear (high and low gear) enables a higher range of rotational speed (optional) and faster work.
- ✓ The safety turning knuckle always guarantees optimum positioning of the ITH PDS.

Type PDS Pneumatic Nut Runner

Directional switch for load- or high gearbox

Compact high performance planetary gear

Square drive

for individual power wrench sockets including fixation mechanism.

Fine-toothed spline

to individually adjust the support in 360°. See page 24 for all supports.

**Air-powered
pneumatic motor**

4-step rotary switch
to set-up the torque.

Directional switch
for Tighten / Loosen,
positioning suitable for
construction sites.

Pistol grip
impact resistant and
non-slip.

Maintenance unit with compressed air precision control valve

Included in every delivery.

For setting the required torque. Including lubricator, water separator, inlet air pressure gauge and pneumatic hose line (3 m as per standard).

Measurement

ITH Torquemeter

- ✓ **Control during bolting procedures:**
Measuring, testing and applied torque values and rotation angles are displayed and documented during the bolting procedure.
- ✓ **Features**
 1. On-site ready by robust design, internal battery for flexible, wireless use.
 2. Available versions are 110 V or 230 V. Digital display shows measurement results clearly.
- ✓ **Certified precision**
Accredited by the strict regulations of the German Accreditation Body (DAkkS).

System ALPHA Angle-controlled tightening

Introduction

Angle-controlled tightening is a method, where the achieved bolt elongation Δl is measured indirectly.

Δl is calculated from the (theoretical) relation between bolt pitch P and rotation angle α

$$\text{Simplistic: } \Delta l = \text{bolt pitch } P \cdot \frac{\text{rotation angle } \alpha}{360^\circ}$$

From achieved bolt elongation Δl you can gain insights about the reached assembly preload F_M , which is your target value when tightening bolt connections (cf. VDI 2230).

Process

- Torque range:** One pre-defined torque M_1 is applied on the bolt connection until all gaps between all components are closed. That is the point where the threshold torque is reached.
- Angle range:** After threshold torque the angle range begins: An angle of rotation α is applied on the bolt connection.
- ITH ALPHA sensor controls** torque M_1 and α .
- Tightening process ends** after reaching α .
- ITH ALPHA software** offers process evaluation, for example automatically generated Excel-or PDF-protocols.

Advantage of less affection by friction: higher precision

- ✓ **Angle range is not affected by friction values:** The angle range is not affected from friction variables, which could be occurring. This leads to higher precision and higher repeatability of the bolting procedure.
- ✓ **Digital ITH application software:** Easy set-up and management of all relevant application parameters.
- ✓ **Low tightening factors α_A :** When designing bolted joints, it can be calculated with small tightening factors from 1.2 to 1.4 in most cases (cf. VDI 2230).

$$*\alpha_A = \frac{F_{M \max}}{F_{M \min}}$$

Technical Information

Assembly preload F_M and tightening torque M_A

Bolt size			Strength grade DIN EN ISO 898 - 1					
			8.8		10.9		12.9	
d [mm]	P	A/F	F_M [kN]	M_A [Nm]	F_M [kN]	M_A [Nm]	F_M [kN]	M_A [Nm]

ITH reference: 09.80053

Calculation basis

Utilisation factor of the yield stress $v = 0,9$ for shank bolts with metric standard thread acc. to DIN 13-20 (minimum dimensions) resp. calculated acc. to DIN 13-19, tolerance class 6g; diameter of the bearing face d_w acc. to DIN EN ISO 4014 resp. DIN EN ISO 4032 up to M64, from M72 acc. to. DIN 2510-5 (d_2); Clearance hole "medium" acc. to DIN EN 20273. Friction coefficients $\mu_G = \mu_K = 0,14$.

The friction coefficient depends on material/surface and used lubricant. d = nominal diameter of thread, P = pitch, s = width across flats.

All values and data are calculated and checked prudently. However, we accept no responsibility for the correctness, completeness and topicality. Technical modifications reserved.

ITH quality management

Before first delivery and after maintenance all ITH Nut Runners are tested and calibrated on dynamic torque measurement units (DAkKS-certified). Measured values are recorded on an ITH calibration certificate.

All ITH business procedures – including development, production and distribution of bolting tools and testing equipment – are certified according to the strict quality management directive ISO 9001 – as a pioneer in the market since 1995.

Qualification in bolting technology

The ITH training courses in reference to **VDI/VDE-MT 2637** combine theory and practice efficiently – independent of the bolting tools you use:

- Level A - ITH On-site Training** - Tool instruction on-site
- Level B - ITH Tool Training** - Safety and tool operation
- Level C - ITH Service Training** - Maintenance and service

In cooperation with you we create an individual training course according to your requirements. By its modular design, ITH training contents can be adapted easily.

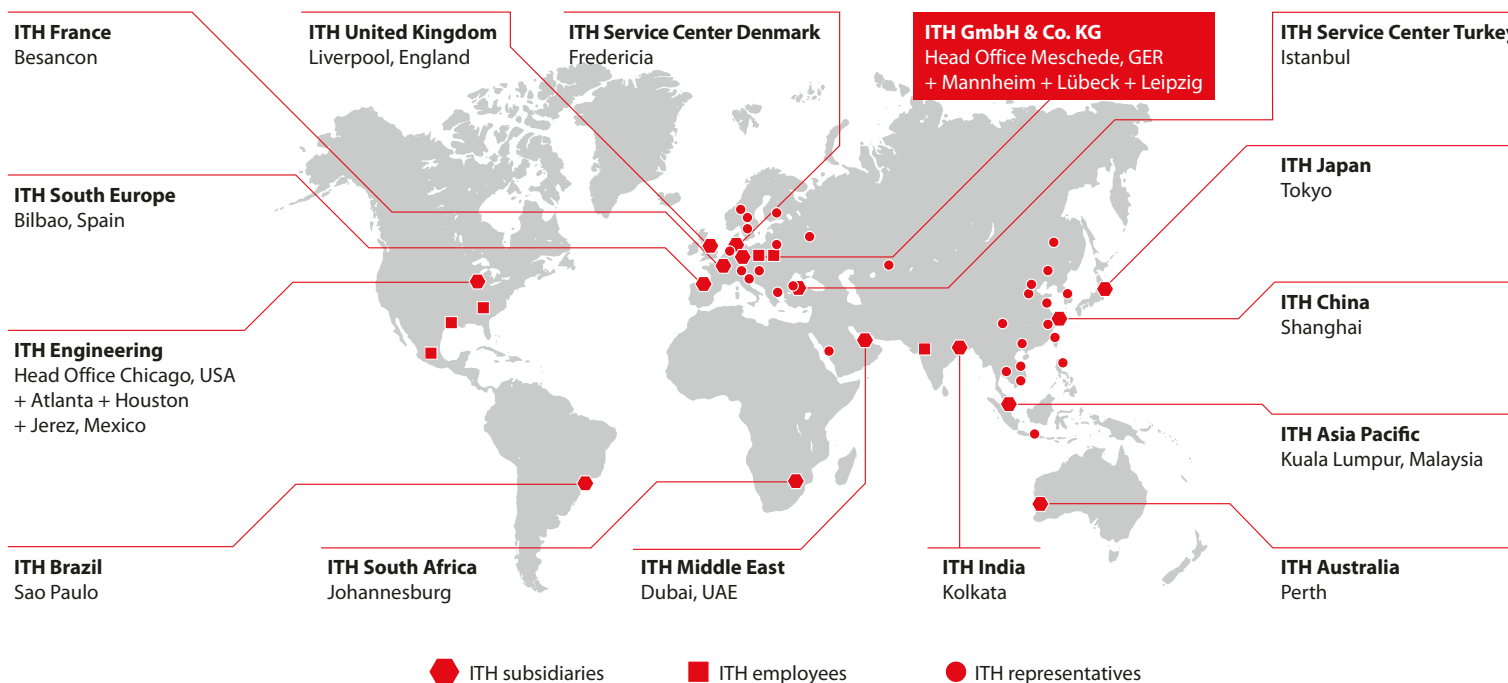

We mediate bolting competencies in terms of safety, technical physical fundamentals, maintenance, service and bolting tool operation. After the theory courses, learned contents will be applied practically to guarantee most efficient learning success. Participants receive a certification after passing a final test.

Service, rental and bolting service

- ✓ **Service on-site**
ITH offers global, qualified tool maintenance and calibration performed locally by the global ITH network. These services can be carried out on-site by ITH Calibration Centers or ITH Service-Vans.
- ✓ **Fast & traceable**
All services are handled quickly, reliably and are recorded internally. Tool calibrations are certified.
- ✓ **Customer-oriented, qualified and flexible**
Experienced ITH bolting service teams have successfully performed a various number of bolting jobs worldwide fast and safely. All ITH bolting tools are available for rent.

Contact

Global leading system supplier in bolting technology

ITH drives innovation

With more than 40 years in the bolting industry, ITH continuously invests experience and know-how into new technical developments. More than 200 national and international patents prove the innovative capabilities of ITH. Many of these developments have become standards of bolting technology.

- ✓ Global technical sales & service network.
- ✓ Qualified, flexible service and fast spare parts availability.
- ✓ Individual industry- or branch specific customer solutions.
- ✓ Synergy effects being a whole system supplier.
- ✓ Competent advice in all bolting cases.
- ✓ Lean Production & certified quality management according to DIN ISO 9001 - as a pioneer since 1995.

ITH offers synergy

The technical and economic efficiency of a bolted connection is decisively determined by the design, the fasteners, the bolting tools and the assembly.

As a whole system supplier, ITH combines the expertise of these 4 sub-divisions (Tools, Engineering, Fasteners, Service) and configures the components with each other to achieve the best technical and economic result for our business partners.

Global ITH network

Individual consultation is important for us. Visit the contact section on the ITH website to find the contact information of the local person in your country. We will be happy to advise you.
